

VMWARE REPLACEMENT PROGRAM 2024

Unlock New Opportunities With Sangfor

Purchase a Sangfor license for 3 years and get 2 years free!

Why is Sangfor the Ideal VMware Replacement?

Holistic Vendor

Sangfor Technologies offers both cutting-edge cyber-security and cloud solutions. This makes it a one-stop vendor for your organization's digitalization needs. We offer all equivalent features of VMware products in one solution, Sangfor Hyperconverged Infrastructure (HCI), including virtualized compute, storage, networking, security, management, disaster recovery, and more.

Local Support

24/7 SUPPORT 

Sangfor has 60+ branches worldwide, with a strong local presence in the countries where we're situated. Our local teams operate 24/7 to ensure direct vendor support, swift response to address your needs, and smooth communication with no language barriers.

Security Specialization

Sangfor HCI offers a complete security suite to ensure robust protection for both workloads and the underlying infrastructure.

Flexible Licensing

Unlike VMware's rigid shift to a subscription model, Sangfor offers both subscription and perpetual licenses. This flexibility allows you to adapt according to your needs without being limited by the cost.
